■ Critical: Mobile Site Speed

Mobile performance score: 0/100. Google considers anything below 50 as poor. A slow mobile site loses customers — studies show 53% of mobile users abandon a page that takes over 3 seconds to load. This is the highest priority technical fix.

■ Desktop Speed Below Standard

Desktop score: 0/100. Even on desktop the site loads slowly — likely caused by large images or unoptimized code.

■ SEO Technical Issues on Mobile

Mobile SEO score: 0/100. Technical SEO issues (missing tags, blocked resources) can directly prevent Google from ranking pages. An SEO audit is recommended.

7. Recommendations & Action Items
