Bot & Unknown Traffic

GA4 automatically filters known bots. **Unassigned/Unknown sessions: 28 (2.0% of total)**. Direct traffic: 454 (33.0%). High direct + unassigned may indicate bot activity or dark social traffic.

■ Website Traffic Declined

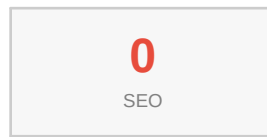

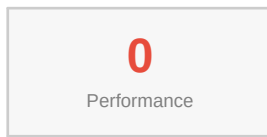

Sessions dropped 23.3% vs the previous period (1,358 vs 1,771). Review if any marketing activities changed or if rankings were lost.

■ Average Engagement

Engagement rate of 47.3% is average. There is room to improve — stronger calls to action, clearer service pages, and faster load times typically increase this.

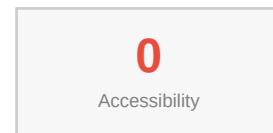

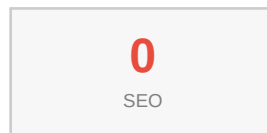

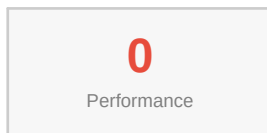

6. PageSpeed — Core Web Vitals

Mobile

Metric	Value	What it means
LCP (Largest Contentful Paint)	N/A	Time to render the largest element
CLS (Cumulative Layout Shift)	N/A	Visual stability score (lower = better)
TBT (Total Blocking Time)	N/A	Interactivity responsiveness
FCP (First Contentful Paint)	N/A	Time to first visible content

Desktop

Metric	Value	What it means
LCP (Largest Contentful Paint)	N/A	Time to render the largest element
CLS (Cumulative Layout Shift)	N/A	Visual stability score (lower = better)
TBT (Total Blocking Time)	N/A	Interactivity responsiveness
FCP (First Contentful Paint)	N/A	Time to first visible content

■ Critical: Mobile Site Speed

Mobile performance score: 0/100. Google considers anything below 50 as poor. A slow mobile site loses customers — studies show 53% of mobile users abandon a page that takes over 3 seconds to load. This is the highest priority technical fix.

■ Desktop Speed Below Standard

Desktop score: 0/100. Even on desktop the site loads slowly — likely caused by large images or unoptimized code.

■ SEO Technical Issues on Mobile

Mobile SEO score: 0/100. Technical SEO issues (missing tags, blocked resources) can directly prevent Google from ranking pages. An SEO audit is recommended.
